# 2005 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons

18 April 2005

Original: English

---

New York, 2-27 May 2005

## Implementation of article VI

### Report submitted by the Islamic Republic of Iran

This report is prepared in accordance with subparagraph 12 of paragraph 15 of the section of the Final Document of the 2000 Review Conference concerning article VI of the Treaty, and deals with measures that have been taken by the Islamic Republic of Iran to implement article VI and paragraph 4 (c) of the 1995 decision on “Principles and Objectives for Non-Proliferation and Disarmament”.

1. The Islamic Republic of Iran believes that reporting, as envisaged in step 12 of the 13 practical steps, provides an essential element to ascertain the implementation of obligations assumed under article VI of the Treaty on the Non-Proliferation of Nuclear Weapons. The Islamic Republic of Iran is of the view that the objectivity of our analysis on the progress towards the goal of nuclear disarmament would be best served through adoption of a format properly defining categories of information required within the review strengthening process.

2. One of the important elements of the step 12 is that the 2000 Review Conference recalled the advisory opinion of the International Court of Justice of 8 July 1996 in conjunction with the implementation of article VI of the Treaty. As the Court stipulated in its advisory opinion in 1996 “there exists an obligation to pursue, in good faith, and bring to a conclusion negotiations leading to nuclear disarmament in all its aspects under strict and effective international control”. The Islamic Republic of Iran, therefore, believes that, while reporting on the implementation of article VI of the Treaty is important, it shall not substitute the fulfilment of the obligation of nuclear disarmament under article VI. Thirty-five years after the entry into force of the Treaty on the Non-Proliferation of Nuclear Weapons, the obligations under article VI have yet to be fulfilled.

### I. Iran’s approach towards the Non-Proliferation Treaty

3. Iran signed the Treaty on the Non-Proliferation of Nuclear Weapons in 1969 and ratified it in February 1970. In June 1973, in accordance with paragraph 1 of article III of the Treaty, Iran concluded a Comprehensive Safeguards Agreement with the International Atomic Energy Agency. Ratifying the Treaty on the Non-

Proliferation of Nuclear Weapons before its entry into force and early conclusion of the Safeguards Agreement, as well as signing the Additional Protocol, clearly demonstrates our long-standing support and commitment as a non-nuclear-weapon State to this fundamental instrument. During the past three decades, Iran has done its utmost to achieve the objectives and purposes of the Treaty. In 1974, Iran was the first country in the Middle East region that initiated the idea of the establishment of a nuclear-weapon-free zone, which was followed by the resolutions of the United Nations General Assembly. In 1995, the Islamic Republic of Iran actively participated in the Review and Extension Conference and joined others in supporting the indefinite extension of the Treaty, with the hope that the agreed package would pave the way for the early elimination of nuclear weapons.

4. The Islamic Republic of Iran has fulfilled its obligations under all provisions of the Treaty. Iran's position to denounce the nuclear option, as a matter of principle, and place its peaceful nuclear facilities under the full scope-safeguards agreement is a clear manifestation of our commitment to a strong Treaty on the Non-Proliferation of Nuclear Weapons. Iran considers the acquiring, development and use of nuclear weapons inhuman, immoral, illegal and against its very basic principles. They have no place in Iran's defence doctrine, not only because of our commitment to our contractual obligations under the Treaty on the Non-Proliferation of Nuclear Weapons, but in fact because of a sober strategic calculation. They do not add to Iran's security nor do they help rid the Middle East of weapons of mass destruction, which is in Iran's supreme interests.

5. The Islamic Republic of Iran believes that all provisions of the Treaty on the Non-Proliferation of Nuclear Weapons are of equal importance. Maintaining the balance of the "rights and obligations" enshrined in the Treaty preserves its integrity, enhances its credibility and encourages the Treaty's universality and full implementation.

6. In accordance with the Final Document of the 2000 Review Conference, nuclear-weapon States made an unequivocal undertaking to accomplish the total elimination of their nuclear arsenals. The 13 practical steps for the systematic and progressive implementation of article VI of the Treaty, as agreed in the 2000 Review Conference, should be vigorously pursued by nuclear-weapon States. Therefore, no action shall be made by any State, in particular nuclear-weapon States, in contravention of those obligations. Regrettably, the new nuclear doctrine of the United States, through development of new types of nuclear weapons and setting rationales for the possible use of nuclear weapons against non-nuclear-weapon States and naming non-nuclear-weapon States as the targets of such new inhuman weapons is a flagrant violation of international law, obligations under article VI of the Treaty and the 1995 Decision on Principles and Objectives, as well as the commitments made by the nuclear-weapon States in the 2000 Review Conference. Furthermore, by continuing the deployment of hundreds of nuclear weapons in other countries and training the air forces of those countries to deliver those weapons in the framework of military alliances, the United States is still in violation of its obligations under article I of the Treaty, which stipulates that "Each nuclear-weapon State Party to the Treaty undertakes not to transfer to any recipient whatsoever nuclear weapons ...".

## II. Measures taken to implement article VI

7. The Islamic Republic of Iran has actively participated in international efforts to promote nuclear disarmament and non-proliferation. Initiatives taken towards this noble goal have always enjoyed our full support. In this regard, the Islamic Republic of Iran voted in favour of General Assembly resolutions such as resolution 59/102 entitled "Convention on the Prohibition of the Use of Nuclear Weapons", resolution 59/63, "Establishment of a nuclear-weapon-free zone in the region of Middle East", resolution 59/64, "Conclusion of effective international arrangements to assure non-nuclear-weapon States against the use or threat of use of nuclear weapons", resolution 59/75, "Accelerating the implementation of nuclear disarmament commitments", resolution 59/77, "Nuclear disarmament", resolution 59/79, "Reducing nuclear danger", resolution 59/81, "Fissile Material Cut-off Treaty", resolution 59/106, "The risk of nuclear proliferation in the Middle East" and resolution 59/109, "Comprehensive Nuclear-Test-Ban Treaty" and other relevant resolutions adopted in the United Nations and other international forums.

8. In line with other members of the Non-Aligned Movement, the Islamic Republic of Iran has, in various forums including the International Court of Justice, made its position clear that the use or threat of use of nuclear weapons is contrary to international law and is therefore illegal. The Islamic Republic of Iran has continuously supported the resolution adopted annually since 1999 entitled "Follow-up to the advisory opinion of the International Court of Justice on the question of the legality of the threat or use of nuclear weapons".

9. Iran considers the early establishment of a subsidiary body in the Conference on Disarmament, with a mandate to start negotiations on a phased programme for the complete elimination of nuclear weapons within a specified time limit, including a nuclear weapons convention, to be a concrete step relating to the materialization of nuclear disarmament.

10. The Islamic Republic of Iran played a prominent role during the negotiations on the Comprehensive Nuclear-Test-Ban Treaty, hoping that the conclusion of the Treaty would prevent the qualitative as well as quantitative development of nuclear weapons. The Islamic Republic of Iran as a signatory of the Treaty is an active member of the Preparatory Commission and hosts five International Monitoring System stations. The 2000 Conference to review the Treaty on the Non-Proliferation of Nuclear Weapons agreed among 13 practical steps to a moratorium on nuclear-weapon-test explosions pending the entry into force of the Comprehensive Nuclear-Test-Ban Treaty. In this context, the Islamic Republic of Iran expresses its serious concern that the United States decided to accelerate "testing readiness" to enable it to reduce the time needed for resuming underground nuclear tests to 18 months. This will clearly put into question the United States commitment to the continuation of its already declared testing moratorium.

11. In addition to the Comprehensive Safeguards Agreement and the Subsidiary Arrangements concluded with the IAEA, the Islamic Republic of Iran signed the Additional Protocol to its Comprehensive Safeguards Agreement on 18 December 2003 and is provisionally implementing it. We regard this as another confidence-building measure to reaffirm our commitment to the Treaty on the Non-Proliferation of Nuclear Weapons. All these measures have been taken in a situation where negligence with regard to the unsafe-guarded facilities and the nuclear weapons

programme of Israel, which enjoys the tacit support of the United States, continues to threaten regional and international peace and security.

12. Owing to the significant role that the establishment of nuclear-weapon-free zones plays in achieving a world entirely free from nuclear weapons, in 1974 Iran initiated the resolution for the establishment of a nuclear-weapon-free zone in the Middle East. Since 1980, this resolution has been adopted annually by consensus in the General Assembly. However, Israel, confident of the political and military support of the United States and through its persistent rejection of accession to any international disarmament instrument, and in particular the Treaty on the Non-Proliferation of Nuclear Weapons, remains the main obstacle to the establishment of such a zone.
